

Table I. *Patients characteristics.*

	Pancreatic cancer (n=80)		Biliary tract cancer (n=18)		Benign pancreaticobiliary diseases (n=28)	
Age (median)	39-90 (69)		29-79 (69)		35-78 (63)	
Sex, M/F	51/29		10/8		14/14	
Location	Head	35	Bile duct (intrahepatic)	5	Chronic pancreatitis	12
	Body and/or tail	45	Bile duct (hilar)	3	Autoimmune pancreatitis	6
			Bile duct (distal)	5	Cholecystolithiasis	3
			Gallbladder	5	Gallbladder adenomyomatosis	2
					Acute pancreatitis	1
					Acute cholangitis	1
					Primary sclerosing cholangitis	1
					Biliary dyskinesia	1
					Pancreaticobiliary maljunction	1
Stage (UICC 8 <sup>th</sup> )	IA	5	I	1		
	IB	5	IIB	2		
	IIA	1	IVA	2		
	IIB	2	IVB	13		
	III	17				
	IV	50
